

升立机械

结构特征:

LGH混合机组是一种针对黏性浆料混合的机组。筒体容器内同时具备搅拌与刮臂的机构，两者相互配合，充分搅拌容器内的浆料。

该混合机组采用主体悬挂、筒体液压提升式结构。此结构方式易于对设备进行清洗并配合筒体专用运输支架与起吊装置，进行移动式浇灌。

Structure:

LGH mixer group is fit for mixing paste. The tank include agitator and wiper arm, at the same time which cooperate each other and completely agitate the paste in the tank.

Structure: the main part with agitator was fixed(hanged) and tank can be vertically elevated by liquid pressure. This structure is convenient for cleaning. Small cart for transporting the tank and elevating device can realize removable feeding.

性能与技术特征:

容积: 100、300、500、1000升

驱动3、5.5、11、15 kW

混合时间 1-4分钟

单驱动双转速

粘壁刮刀

筒体移动浇灌式

Performance and features:

Capacity: 100, 300, 500, 1000 litres

Drive: 3, 5.5, 11, 15 kw

Mixing time: 1-4 minutes

Single drive and double rotation speed

Wiper arm/scapper

Movable tank
